CMMS Computerised Maintenance Management System incorporating EAM Enterprise Asset Management

....enabling
complete
maintenance
control.

The MOMENTA EAM, CMMS cloud System: for all your maintenance needs

MAINTENANCE GETTING YOU DOWN - YOU NEED MOMENTA

Everybody readily reports what is done, this is nice, however many people especially in the maintenance field withhold dreaded information about what has NOT been done during the scheduled maintenance. these are often key factors to understanding the phenomena; "this was just done last week... how can it be broken?"

With Momena

- Every maintenance task is available anywhere anytime.
- Momena keeps you aware of what is not done.

HOW ARE YOUR MAINTENANCE STRATEGIES PERFORMING ?

- Are your work orders, scheduled maintenance falling through the cracks?
- Is your paper-based system cumbersome and not scalable?
- Have a inefficient process of receiving maintenance notifications?
- Mounting delays, mistakes are proving, time consuming and costly?
- Are you meeting maintenance or industry requirements?
- KPI's are they being monitored effectivley?
- Need to save time and money.?
- Have correct maintenance stratagies for your assets?

PERFORMING BREAKDOWN MAINTENANCE ONLY?

Breakdown Maintenance is essentially no maintenance at all, Equipment is simply allowed to operate until complete failure, or where inefficiency or product quality problems force a shutdown.

This poses the following....

- Loss of production staggering costs that cannot be recovered.
- Breakdowns are more expensive than planned repairs.
- Breakdowns generally cause longer down time.
- Personnel or spares may not be available at breakdown.
- Catastrophic breakdowns can be safety hazards.
- Equipment life span is shortened on breakdowns.

REACTIVE MAINTENANCE - YOU NEED PREDICTIVE MAINTENANCE

It's a proven fact that Reactive maintenance or Breakdown maintenance is common in most industries, that do not have Predictive or Preventative measures in place. Deemed cheaper over the short term, the loss in potential profits, decline in quality standards, replacing instead of maintaining is one of the prime reasons why business will not be more successful, due to lengthy stops during planned production times, this is most certainly one of the Productivity killers.

Momenta CMMS is

- Affordable, easy to implement, user friendly.
- Will help your industry to excel be, certified, accredited, and importantly Profitable!
- With Momenta preventative and Predictive Maintenance tools on hand 24/7/365, Momenta will always keep your Maintenance Schedules up to date.

- Many of these features will become available during the coming months.

MOMENTA SYSTEM E.A.M ENTERPRISE ASSET MANAGEMENT

Management of your assets is provided through an Asset Hierarchy. At the top level you have the Factory Level and below that the Plant Level. The Plant assets contain Equipment Assets which in turn contains Components. If you do not like the names of these levels (Factory, Plant, Equipment and Component) you have the ability to rename the Levels.

When you add users you can associate the user at any one of the top three levels. That will enable the user to act on and view all the assets below that node in the hierarchy. A user can have access to multiple assets at the assigned level.

MOMENTA WRAPPING IT UP.

Lets wrap it up Apples and Apples. Momena will..

- Control your maintenance strategies.
- Let you know...
 - Who is responsible for what.
 - Who is accountable.
 - What is my liability.
- Correctly time your maintenance that will be a driver for.
 - Productivity.
 - Efficiencies.
 - Quality.
 - Profit.
- Assist in lowering your carbon foot print.
- Lower your overall operating costs.

Momena is..

- Proudly South African.
- Self customisable to your business.
- Quick and easy to implement .
- Affordable to any business, only pay for what you use.
- No capital outlay.
- Cloud and SaaS.
- Available in virtualy any language.
